Marex Spectron goes live with MDX Technology

London – 14th May 2013 – MDX Technology, Ltd. (MDXT), a leading provider of real-time market data connectivity, sharing and publishing solutions, is very pleased to announce that Marex Spectron, one of the world's largest commodity brokers, has gone live with MDXT globally.

As part of a strategic group wide initiative, Marex Spectron is now using MDXT for real-time market data sharing between its global broking teams, to further enhance the execution service they give to their clients. Additionally, the broker will use MDXT for the capture of key data for analytics and the distribution of that data internally and externally.

Glenn Channon, Head of Software Development at Marex Spectron, said “Our brokers rely on their ability to make fast, strategic decisions with information from multiple sources. We were very impressed by MDXT’s ability to understand our business processes and deliver flexible solutions to enhance them”.

Paul Watmough, CEO of MDXT, said “We are very pleased that our highly efficient data sharing technology is being used so effectively by Marex Spectron and look forward to working with the company on other projects”.
